Frontend developer with 4+ years building and maintaining UI for customer-facing products and internal dashboards in the travel industry — across web, mobile-web, and in-app platforms. Comfortable owning features end-to-end in large, shared React codebases, working closely with product, design, backend, and QA. Use AI tools (Cursor, Claude) daily to move faster on complex logic, ship well-documented code, and continuously build new skills.

EXPERIENCE

Flymya Tech Co., Ltd (Flymya.com)

Frontend Web and Mobile Developer

Dec 2023 – Present

Junior Frontend Developer

Apr 2023 – Dec 2023

- UI development across customer-facing booking flows in React, Context API, and Tailwind CSS/styled-components, on web and mobile-web
- Build internal admin dashboard features (forms, tables, workflows) in React with Redux, Formik/Yup, and Material UI/CoreUI components
- Keep the React Native app aligned with web after UI/logic changes, ensuring a consistent cross-platform experience
- Own feature delivery end-to-end — from implementation to web UAT testing and production release via PRs
- Support mobile releases as a team member — APK/TestFlight builds and versioned App Store/Play Store pushes
- Monitor performance monthly via Google PageSpeed Insights — cut homepage CLS 40% desktop / 60% mobile
- Debug and resolve production UI and data-fetching issues (GraphQL/Apollo) from QA/user feedback
- Partner with internal operations teams — gather feedback through regular meetings and provide fast, quality support for dashboard workflows
- Use AI tools (Cursor, Claude) daily to speed up complex feature work, raise code quality, and keep code well-documented
- Collaborate with product, design, backend, and QA in Scrum sprints using feature branches and PRs

Innovix Solutions

Junior Frontend Developer

Dec 2021 – Apr 2023

- Developed and maintained responsive websites (Pug.js, Gulp), focused on consistent UI and performance across devices and screen sizes
- Built interactive, dynamic UI components for e-commerce sites, improving user engagement
- Collaborated closely with designers to translate UI/UX specs into seamless, production-ready interfaces

SKILLS	
Frontend	React, React Native, JavaScript, TypeScript, Next.js, Redux & Context API
Styling & UI	Tailwind CSS, styled-components/Sass, Material UI, responsive & mobile-web UI
Forms & Data	Formik + Yup, GraphQL/Apollo Client (client-side), multi-step booking flows
Tools	Git, SourceTree, Bitbucket, Figma, WordPress (freelance), Agile/PR-based workflow
AI-assisted Development	Cursor, Claude — daily use with project-specific agent context, for higher-quality, well-documented code and continuous skill-building

EDUCATION	
European International University (EIU–Paris)	Jul 2025 – 2027 (in progress)
B.Sc. IT & Data Science (BSITDS), Final Year Top-up	
University of Computer Studies, Yangon	Dec 2016 – 2020
B.C.Sc., coursework completed	

LANGUAGES	
English (Conversational) · Burmese (Native)
